

HOW MUCH PRODUCT DO YOU NEED?

At Pacific Topsoils, Inc, we sell all our products by the cubic yard.

To calculate how many cubic yards you will need...

First, determine your square footage by measuring the length and width of all the areas. Multiply each areas length and width separately and then add all the areas together, this will give you the total square footage.

Now to convert this to square yards, divide the square footage total by 324.

Finally, to determine the overall cubic yards, multiply the square yards total by the number of inches in depth that you will be applying the material.

We recommend rounding up as some items experience compaction after placement.

Product calculator also available on our website pacifictopsoils.com.

We deliver materials in full cubic yards, no halves. But you can pick up as much or as little material as you like from our many retail location. There is a \$15.00 minimum on all picked up materials.

RECYCLING

ATTENTION: New regulations for Washington State require a Clean Soil Acceptance Form accompany all soil disposal. Form is available at disposal location or on our website PacificTopsoils.com under "Forms."
